Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

1. Figure 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "a predetermined certain position" is unclear because it is unclear to which position is to be predetermined as applicants are claiming.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3748

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of Schibbye (Patent Number 3,307,777) or Kodra (Patent Number 3,535,057).

Regarding claim 1, Schibbye (as shown in Fig. 1) or Kodra (as shown in Fig. 1) discloses a screw compressor comprising: screw rotors (28, 30 in Schibbye, 26, 36 in Kodra); a suction/discharge side rotor shafts (36 in Schibbye, 28, 38 in Kodra) of the screw rotors; a suction/discharge side bearing casing (22, 24 in Schibbye, 22, 18 in Kodra); a suction side angular ball bearing (32 in Schibbye, 30, 40 in Kodra); a discharge side angular ball bearing (34 in Schibbye, 29, 39 in Kodra) rotatably supporting the discharge rotor shafts and being held within the discharge side bearing casing (24 in Schibbye, 18 in Kodra).

Regarding claim 3, Kodra discloses a lubricating is applied to an inner periphery surface of the suction side bearing casing.

Allowable Subject Matter

4. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The IDS (PTO-1449) filed on October 20, 2003 has been considered. An initialized copy is attached hereto.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of two patents.

Art Unit: 3748

Mori et al. (Patent Number 4,557,679) disclose a rotary fluid machine with thrust bearing mounting unit.

Kuroshima et al. (Publication Number JP 05-010283) disclose a closed type screw compressor.
